

PARIDHI GARG

CREATIVE TECHNOLOGIST

New York, NY | 917-519-6703 | paridhigarg27@gmail.com | www.paridhiworks.com

I design and develop digital products and interactive experiences that utilize various emerging technologies to build intuitive and playful interactions. Through rapid prototyping, user research and iterative design thinking, I create systems that introduce people to new ways of thinking and being. These projects often exist at the confluence of design, technology, human behavior and environments. I graduated with a BFA in Design and Technology from Parsons School of Design.

EXPERIENCE

Underground Art and Design

Intern *Oct 2025 - Present*

- Co-editor for TechnoMirage, a curatorial and publishing project exploring the intersections of AI, speculative design, and collective imagination conducting interviews with artists, designers and technologists
- Event setup for Neuromantics, a creative tech exhibition in New York featuring XR journeys, live interfaces and interactive installations

VMGROUPE

Intern *Dec 2025*

- Designed an immersive environment for a launch event through thoughtful spatial setup that best communicated brand values and identity

DLR Institute for AI Safety and Security

Researcher, UI Developer & Experiential Designer *Oct 2024 - Dec 2024*

- Led research for a quantum computing installation at DLR Institute for AI Safety and Security, translating complex scientific concepts into tangible experiential design with a multidisciplinary team from Parsons School of Design and Köln International School of Design
- Developed the physical interface with interactive touch controls to trigger audio and control programmable LEDs, showcasing hands-on experience with lighting, audio and control systems

Google AI Hackathon

UI/UX Designer, Developer & Prompt Engineer *Apr 2024 - May 2024*

- Gained a technical understanding of LLMs and developed an AI-powered cooking web app "Granny Bytes" that uses Google Gemini API, implementing full-stack development with image analysis and conversational UI
- Led UI/UX development and prompt engineering to design and build an intuitive user experience

IBM Quantum Design Jam

Creative Technologist & Experiential Designer *Oct 2022 - Mar 2023*

- Applied quantum computing principles to build "Move a Bit", an innovative interactive installation that makes complex quantum computing accessible
- Collaborated with a multidisciplinary team to build a real-time motion capture experience where participants' movements directly controlled a dynamic visual particle system, bringing quantum computing to life

EDUCATION

Parsons School of Design, New York *Aug 2021 - May 2025*

BFA Design and Technology, Creative Technology
GPA 3.93

Sardar Patel Vidyalaya, New Delhi *Apr 2007 - Jun 2021*

Higher Education-Science
GPA 4.0

EXHIBITIONS

- "Quantum Art Exhibition" — Microscope Gallery, New York, USA, *March 2023*
- "Move A Bit" — Sheila C. Johnson Design Center, New York, USA, *March 2023*
- "Fleeting States + Measured Values" — Köln International School of Design, Cologne, Germany; Sandberg Institute, Amsterdam, Netherlands, *November 2024*
- "Mosaic Pop-up show" — Parsons School of Design, New York, USA, *May 2025*

PUBLICATIONS AND PRESS

- Press:** "The Art and Design of Quantum Computing", The New School, New York, *March 2023*
- Press:** "How to show off quantum computing", KISD, Germany, *November 2024*
- Research:** "Technology as a Stranger", Research Paper, *Jan 2025 - May 2025*

HONOURS

- Dean's List | 2021-2025
- Scholarship in Computer Science for Outstanding Performance | 2021

SKILLS

Real-time 3D & Interactive Platforms:

TouchDesigner, Blender 3D, Unity, MadMapper, Isadora

Creative Technologies:

Projection Mapping, LED Programming, Physical Computing, Real-time Interactive Systems, 3D Rendering

Design Applications:

Adobe Creative Suite (AI, PSD, ID, PR, LR), Figma, Webflow, Framer

Programming:

Python, HTML/CSS, JavaScript (Node.js, Express.js), SQL

Web Design & Prototyping:

Wireframing & Prototyping, User Testing, Websockets, Touch Interface Design, Responsive/Adaptive Design

AI & Generative Systems:

Prompt Engineering, Training & Fine-Tuning Text Generation Models, OpenAI API, Anthropic API, Google Gemini API, Hugging Face, Stable Diffusion, StyleGAN, Runway ML, ElevenLabs, TTS/STT, Cursor

Digital Fabrication:

Laser Cutting, 3D Printing

Other:

Microsoft suite, Git/Github
